Warranty

Batsource.net is not responsible in any way if slight alterations have to be made to the bat in order to accomplish the shaving process. It is very possible the balance of the bat will feel different than when stock due to material being removed and end load added back in. There is no warranty if cracking or denting occurs after shaving the bat. It is recommended that very little batting practice after the work has been performed. Also do not use the bat in under 60 degrees; following these guidelines will help prolong the life of your bat.
